### Description

Mulcahy Construction has demonstrated their ability to successfully undertake major refurbishment projects with their recent work on Mikey Ryan's Bar & Kitchen in Cashel, Co. Tipperary. The project involved the meticulous restoration of a listed building, coupled with the construction of a new extension at the back of the building. Working in collaboration with esteemed architects and designers, the team was able to bring the project to life in a way that truly reflected their vision.

Their outstanding craftsmanship and attention to detail were evident in every aspect of the restoration project. The result is a stunning space that has been highly praised and featured in local and national media outlets. The new design of the space perfectly blends the historic charm of the building with modern elements, creating a one-of-a-kind atmosphere that is both inviting and inspiring. This project is a testament to the expertise of the Mulcahy Construction team and their commitment to delivering exceptional results.

One of the notable additions to the refurbished space is the glass well, which was designed for private dining all year round. This outdoor/indoor space provides a unique dining experience that allows guests to enjoy the beauty of the outdoors while being sheltered from the elements. The space is elegantly designed and includes top-quality finishes, making it the perfect setting for a memorable dining experience.
