Kenneth Hennessey
Architects.

Structural Engineers

DRA Consulting Engineers.

Mechanical & Electrical Engineers

Ronan Meally Consulting
Engineers.

Duration

9 months

Contract Value

€2.1 Million

Description

A Comprehensive Three-Phase Project, this project consisted of three phases of work spanning over 12 weeks, between two separate office block buildings. The first phase involved the removal of existing furniture, partitions, ceilings and flooring. Once the demolition was complete, new partitions were installed to create a new layout of offices and customer service desks. Additionally, new doors and frames, counters and desks were provided and installed, along with new flooring and ceilings.

The project also included a complete rewire to each phase of the work, as well as the installation of new air conditioning and ventilation systems, lighting and power systems. The team of contractors worked tirelessly to ensure the project was completed on time and within budget.

The new layout of offices and customer service desks was designed to improve the flow of people and create a more comfortable and efficient work environment. The installation of new counters and desks enhanced the customer experience and made the workspace more user-friendly. The result was a modern and stylish office space that met the needs of both employees and customers alike. Overall, this project was a great success and a testament to the hard work and dedication of the team involved.
